JSZ for cutting steel sections

OIL, PETROCHEMICAL AND PIPE FABRICATION INDUSTRIES

and pipe up to 300mm

Originally made for use in underground coal mining the JSZ is now used in the Oil & Petrochemical and Pipe Fabrication Industries for cutting steel sections and pipe up to 300mm (12") diameter.

The Saw comes complete with a pipe & profile clamp and a blade guide to ensure straight cuts. Using it in a mounted position means there is no hand arm vibration problem. Optional automatic feed facility available on request.

This dual speed machine is fitted with automatic lubrication and a trigger lock.

Uses Cengar 25mm (1") wide Bi-Metal Saw Blades
